KEYNOTE SPEAKER

John Sileo, Cybersecurity Expert, CEO & President of The Sileo Group

John Sileo lost his million-dollar startup, his wealth, and two years of his life to cybercrime. The losses not only destroyed his company and decimated his life savings but consumed two years of young fatherhood as he fought to stay out of jail.

John shares his story and hard-earned wisdom as a cybersecurity expert, award-winning author, 60 Minutes guest and keynote speaker for the Pentagon, Amazon, and thousands of audiences worldwide. President and CEO of The Sileo Group, a Colorado-based think tank, John graduated with honors from Harvard University and was recently inducted into the National Speakers Hall of Fame.

John finds his greatest pleasure hiking in the Rocky Mountains with his amazing wife and strong daughters, the lovely family who helped him turn life's lemons into something much sweeter and more fulfilling.
